

“PATIO HERRERIANO” CENTRE DE ARTE CONTEMPORANEO ESPAÑOL

This airy museum is located in one of the cloisters of the Monastery of San Benito. Built during the Renaissance and restored with a 21st century twist, the building lends a clarity and functionality to the contemporary displays within whilst also hinting at a more ancient austerity. The 11 rooms of the permanent collection feature works selected to display the diverse shades, evolution and movements of Spanish art through the 20th and 21st centuries.
